4.WRITE A JAVA SCRIPT PROGRAM TO VALIDATE USERNAME,PASSWORD AND EMAIL?

```html
<!DOCTYPE html>

<head>

<title>Login Form</title>

<script type="text/javascript">

function login()

        {

          var name=document.getElementById("name").value;

          var mailid = document.getElementById("email").value;

          var pwd = document.getElementById("pwd1").value;

          var filter = /^([a-zA-Z0-9_\.\-])+\@(([a-zA-Z0-9\-])+\.)+([a-zA-Z0-9]{2,3})+$/;

          if(name==='')

          {

            alert("Enter Your Name");

          }

          else if(mailid ==='')

          {

            alert("please enter mail id.");

          }

          else if(pwd ==='')

          {

            alert("enter the password");

          }

          else if(!filter.test(mailid))

          {

            alert("Enter valid email id");

          }

          else if(pwd.length < 7 || pwd.length > 7)

          {
```

```
                alert("Password min and max length is 7");

              }

          else

          {

            alert('Thank You for Login');

          }

          }

</script>

</head>
